- Between 2016-2021, the NE Go NAP SACC team received three different [awards](#) on a statewide or national level.

### Partnering Organizations Collaborating to Support Healthy Young Children

“When I started Go NAP SACC, my child care program was still fairly new. Prior to participating in Go NAP SACC, I was lacking a lot of nutrition and physical activity information. I have learned so much from Go NAP SACC for nutrition and physical activity that I have incorporated into my program, which has made big improvements in my child care. My Go NAP SACC trainer was very informative and always had great resources which made this a lot easier to make the needed changes.”

– Family Child Care Home Owner, Hastings

“Go NAP SACC has made a huge impact on my child care setting - implementing family style eating, adding more physical activity, and reaching more breastfeeding best practices were some of the areas I improved. Through these changes I also saw a major improvement in how the kids acted. The program helped me in providing better care, as well as providing continued support for my child care families and even other providers in the early childhood field.”

– Family Child Care Home Owner, Omaha

Go NAP SACC (Nutrition and Physical Activity Self-Assessment for Child Care) is an evidence-based program for improving the health of young children through better nutrition and physical activity in ECE programs.
